

# National 12

## Price list 2026

Simon Hipkin boats offers a choice of Dead Cat Bounce, Paradox and Paradigm hull shells with custom deck and internal layout to customer's specifications. Moulded in carbon/epoxy foam sandwich with spray-painted finish. Prices depend on exact specification, the following prices are a guide.

### Dead Cat Bounce

The innovative DCB design from Jo Richards has proven itself at Burton week since 2009. Jo designed the boat around the rudder wing foil.

- Great all-rounder
- Well behaved on all points of sailing
- Wings work in all but the lightest of zephyrs
- Proven championship winner

### Paradox

The Paradox design from Bim Daser has maximum width decks providing maximum hiking leverage. The winged rudder was a retrospective addition but works well on the design.

- Maximum hiking power
- Great top end speed
- Wings kick in at ~4 knots of boat speed

### Paradigm II

The Paradigm II design by Gavin Willis sports a winged rudder and higher side decks than standard 12s giving plenty of leg room and easy tacking.

- Daggerboard rudder option to lift wings out of the water in light winds
- High freeboard
- Good leg room
- Easy to roll-tack

Bare hull, faired and primed and ready to paint	£5,000*
Bare hull, painted and ready to fit out	£6,000*
